Coatings

Protective Coatings

We specialise in high-quality surface preparation and protective coatings across a wide range of industries. Our team delivers tailored solutions designed to protect against corrosion, erosion, chemical exposure, and general wear.

We provide services across a range of industries, including:

- Oil & Gas
- Renewable Energy
- Nuclear
- Water Utilities / Water Treatment
- Utilities
- Marine & Offshore
- General Engineering & Fabrication
- Food & Drink

With years of hands-on experience, we understand what works in the real world. Whether it's a repair, a refurbishment, or a full protective coating system, we're focused on extending equipment life and keeping critical assets in service.

In-House Capabilities

Our in-house capabilities ensure we can deliver high-quality results with full control over timelines and quality.

Our state of the art facility includes:

- 2 Overhead Cranes - 5 tonne and 10 tonne lifting capacity
- 2 Blasting Booths for efficient and precise surface preparation
- 3 Spray Booths (internal (heated) and external) for a wide range of coating applications
- 2 Phosphate tanks
- Forklifts with multi-lifting capabilities
- Curing Ovens for optimal coating curing and finish

Treatments we offer:

- Zinc & Manganese Phosphate
- Xylan
- PTFE 1201, 1301 Molykote
- Epoxy (high built paint systems)
- Shot Peening
- Blasting (NORSOK M-501, System 1-9)

These in-house capabilities allow us to offer complete, tailored solutions under one roof. We can handle large components, complex pieces, and multiple jobs simultaneously, ensuring quality control and efficient turnaround.

Inspection & Quality Assurance

All coating work is overseen by experienced specialists who hold certificates in NACE Basic Corrosion, alongside NACE Level 1, 2 and 3 and NORSOK M-501. This ensures every stage of the process is carried out to the correct specification. From initial surface preparation through to final inspection, we follow strict procedures and Inspection Test Plans to guarantee coating integrity and full compliance.

We carry out all standard testing as required, including:

- Environmental condition monitoring
- Surface profile measurements
- Dust tests
- Soluble salt testing
- Wet film thickness (WFT)
- Dry film thickness (DFT)
- Cure testing
- Adhesion testing
- Holiday testing

Inspection services include:

- Site surveys and condition reporting
- Ongoing maintenance inspections
- Coating system assessments
- Pre- and post-application inspections
- Full documentation and traceability

The Complete Coating Solution

From initial preparation to final inspection, we provide a seamless, in-house service for your most critical assets
