GLOBAL EXPERTISE LOCAL RESPONSE

FIELD SERVICE ENGINEERS

Our global network of Field Service Engineers is ready to respond quickly to breakdowns and pump failures. We service LNG Carriers, FSRU's, FSU's and Onshore LNG Terminals worldwide, with expertise across all types of cryogenic pumps.

WORKSHOP SERVICES

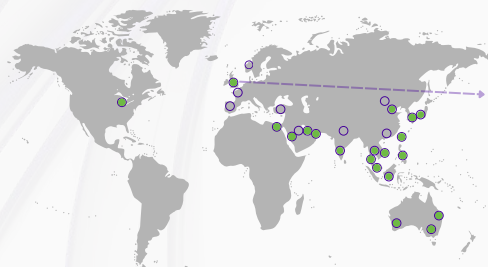

CPR Ltd is headquartered in Scotland but operates globally through the extensive Torishima network of workshops and service teams. This enables us to deliver high quality support and rapid turnaround times wherever our customers are located.

**20+ SERVICE CENTRES
IN 17 COUNTRIES**

SPARE PARTS - QUALITY ASSURED

We supply high-quality OEM-equivalent spare parts, including precision-made bearings manufactured in the UK. Through Torishima's REDU philosophy, we re-engineer and repair rotating components such as impellers, rotor shafts and inducers to the highest standards—helping identify equipment failures, improve performance and enhance proactive reliability.

ISO CERTIFIED

All spare parts are manufactured to the highest cryogenic specifications.

CPR Ltd is fully registered with ISO 9001:2015 accreditation.
