

Cryo Pump Repairs

CPR

CRYO PUMP REPAIRS LTD

Cryo Pump Repairs

One Stop Shop for the aftermarket services of the cryogenic pumps, valves and compressors

Quality based on experience and innovation.

More than 30 years offering liquefied gas pumping solutions adapted to the needs of each customer project.

HOW DO WE WORK?

We offer a personalised service that addresses the most important points for our customers.

- Highly qualified engineers and **innovative technologies** ensure **quality** control.
- **Flexibility** to work with any cryogenic pump and offer customized parts globally.
- Priority on **meeting deadlines, providing faster service** than other original manufacturers.

One Stop Shop for the aftermarket services of the cryogenic pumps, valves and compressors.

Our business focuses on tailoring to customer needs by offering a customised package of fully guaranteed quality products and services.

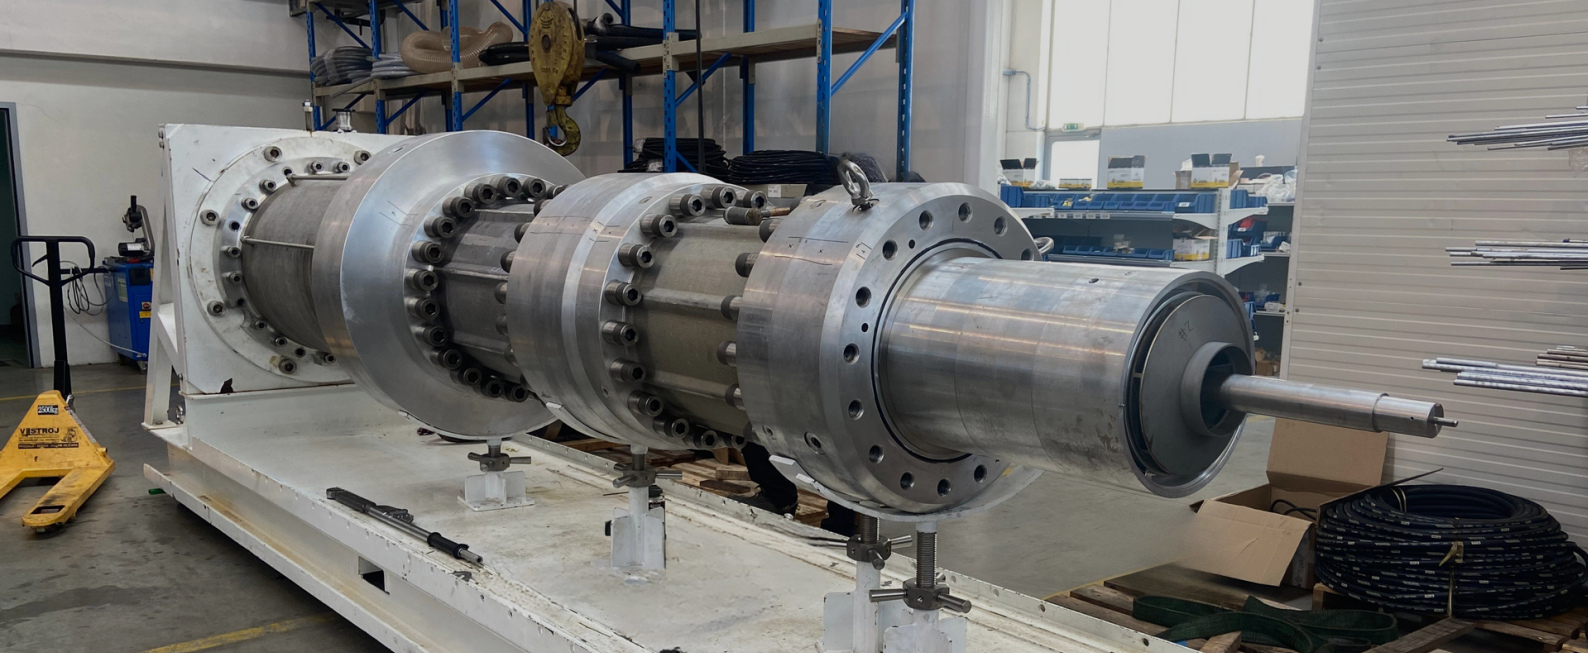

FIELD SERVICE

Engineers worldwide

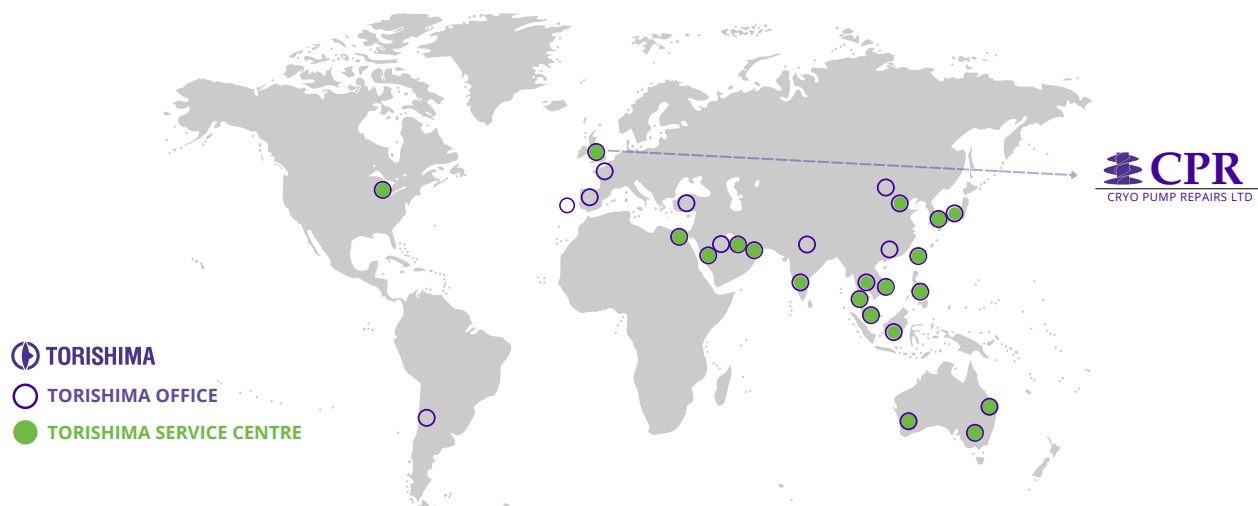

As part of the Torishima Group, CPR benefits from access to Torishima workshops globally, ensuring a worldwide network of field service engineers ready to address breakdowns and pump failures at short notice.

CPR is equipped to service a wide range of sites, including LNG and LPG plants, ships, terminals, and shipyards. Our engineers are proficient in servicing all types of cryogenic pumps.

More than 20 workshops in 17 countries

UK EGYPT QATAR SAUDI ARABIA U.A.E INDIA CHINA JAPAN TAIWAN PHILIPPINES
THAILAND VIETNAM MALAYSIA SINGAPORE INDONESIA AUSTRALIA

WORKSHOP SERVICES

CPR Ltd is headquartered in Scotland but operates globally, thanks to the extensive Torishima network of workshops and service teams. This global infrastructure enables us to deliver high-quality support and rapid response times wherever our customers are located. We can fully overhaul customers' equipment with a much faster turnaround time than OEM suppliers

SPARE PARTS

Quality assured

CPR Ltd offers high-quality OEM-equivalent spare parts, including precision-made bearings manufactured in the UK. Additionally, we specialize in re-engineering and repairing rotating components such as impellers, rotor shafts, and inducers.

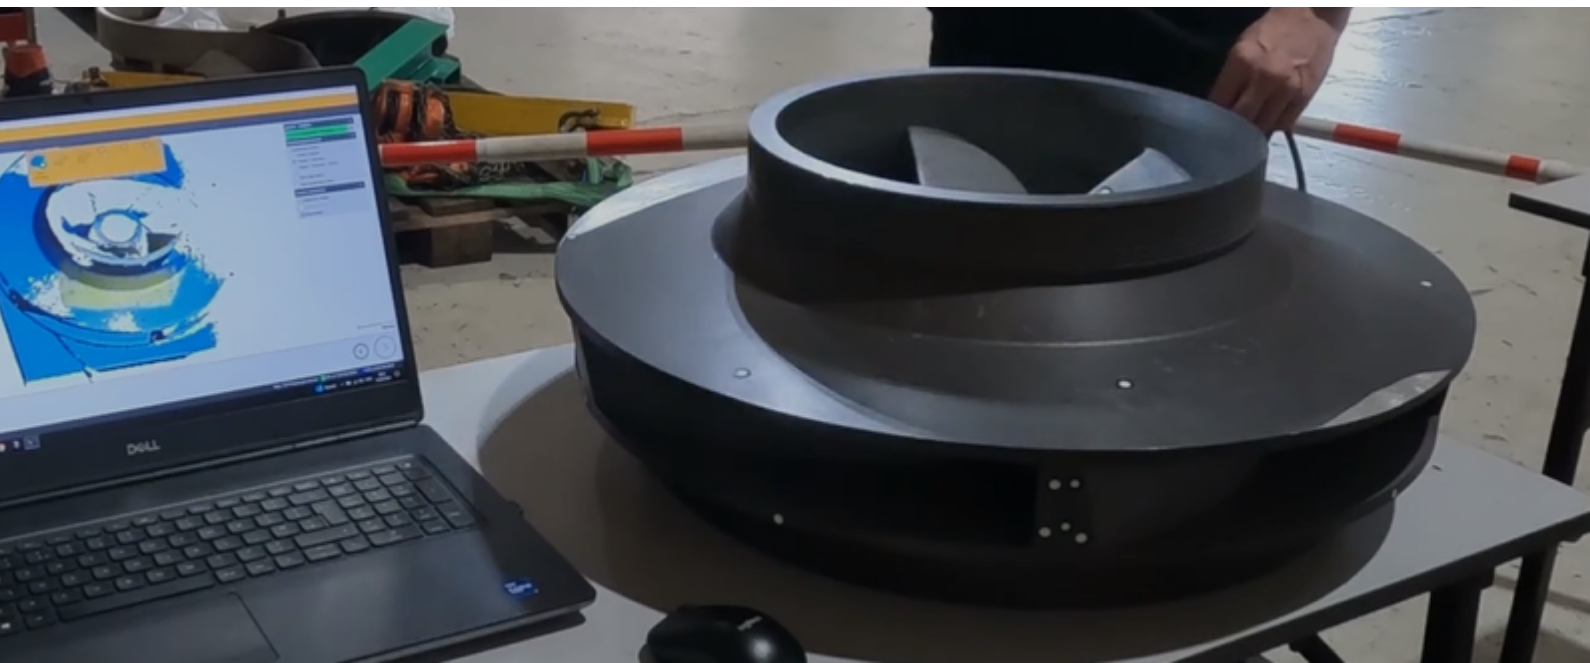

In line with the engineering philosophy developed by Torishima known as REDU, at CPR we apply reverse engineering in much of our work.

Through this process we are able to more accurately identify equipment failures, make engineering improvements and maintain proactive maintenance.

ISO CERTIFIED

All spare parts are manufactured to the highest cryogenic specifications. CPR Ltd is fully registered with ISO 9001:2015 accreditation.

PART OF THE  **TORISHIMA** GROUP

Innovative systems solutions coupled
with expertise in pump technology.

Maximise efficiency, reduce maintenance costs and conserve energy in all applications through innovative products and solutions.
