

Torishima Service Solutions

Capability Document - **Middle East**

Torishima Service Solutions

Innovative systems solutions coupled with expertise in pumping technology.

As a leading supplier of engineering equipment, our main objective is to provide comprehensive solutions that benefit our customers in multiple aspects:

Optimising Efficiency

We work to improve our customers' operational efficiency, ensuring optimal performance of their assets.

Reducing Energy Consumption

We develop solutions that minimise energy consumption, contributing to a more sustainable and economical operation.

CO2 Reduction

We are committed to reducing our carbon footprint through advanced technologies and responsible practices.

Mean Time Between Failure

We develop equipment that meets specific process requirements, improving reliability and extending system life.

Mechanical Services

Across our network of workshops, Torishima Service Solutions provides mechanical services for in situ repairs, inspections, overhauls and installations on a wide range of rotating and static equipment across industries.

Our engineering staff are specially trained to handle pumps, motors, compressors, gearboxes, steam and hydro turbines, heat exchangers, fans, mechanical seals and valves.

We have also developed a pump optimisation process, REDU (Re-Engineering and Design Upgrade), that restores or enhances worn and obsolete components, improving efficiency, reliability and operational life while helping operators manage performance and parts availability.

Oil & Gas Services

We provide comprehensive pump services and engineering support to the oil and gas sector, covering upstream, midstream, and downstream applications. We specialise in the overhaul, repair, and performance testing of API-compliant pumps, along with associated rotating equipment. In addition, we design and supply engineered skid packages tailored to specific process and operational requirements.

Our regional facilities in the Middle East are equipped for hydrostatic, hydraulic, and gas pressure testing, ensuring every component meets stringent industry standards. Services include precision machining, reverse engineering of obsolete parts, and the supply of OEM and engineered-to-order spares.

Dewatering Solutions

Torishima Service Solutions offers a comprehensive range of diesel and electric-driven dewatering pumps engineered for demanding environments. With smart features and fast availability, our solutions are built to perform and easy to support.

Backed by decades of engineering experience, our in-house team delivers complete dewatering solutions - from initial design and fabrication to onsite commissioning. We provide expert support throughout the project lifecycle.

Advanced Diagnostics

Our tailored service packages keep your rotating equipment performing at its best. From essential health checks to in-depth monitoring and engineering studies, we provide the insight and expertise you need to optimise performance.

Our advanced diagnostics quickly detect and resolve common mechanical issues, such as bearing defects, imbalance, misalignment, bent shafts, and lubrication problems - helping you prevent failures, reduce downtime, and extend equipment life.

Spare Parts

Our spare parts service is tailored to meet our customers' exacting standards of quality and certification. We supply OEM-quality components, backed by full inspection and 3D modelling capabilities, as well as stocked materials for rapid turnaround.

From mechanical seal repair or replacement to precise material verification, every part is designed to restore equipment to like-new condition. Supported by the Torishima warranty, our solutions ensure maximum performance, reliability, and extended equipment life.

Workshop Services

Our technical and workshop services are designed to minimise downtime and extend the life of critical equipment. We deliver complete overhauls, precision repairs, dynamic balancing, shaft straightening, NDE and specialist fabrication, welding, machining, and testing, all under one roof.

In-house training for site teams further supports operational efficiency, while every service is carried out to the highest standards of quality, safety, and reliability, backed by Torishima's proven engineering excellence.

Committed to advancing industrial technology with innovative, efficient and reliable solutions

Founded in 1919 in Osaka, Japan, Torishima is a specialist pump manufacturer and industrial service provider.

Our passion for the products and services we offer drives us to keep innovation at the heart of our business and to remain a leading company in the industry, evolving every day and aspiring to be indispensable to society.

Driving Industrial Evolution

Our History

Torishima Service Solutions operates as a subsidiary of Torishima Pump Manufacturing Co. Ltd, founded in 1919, Osaka, Japan. We have service centres across: Japan, Europe, Asia, Australia, USA and the Middle East

Renowned for our expertise, we provide world-class engineering solutions, specialising in pumps and rotating machinery, oilfield equipment, dewatering pumpsets, chemical injection and dosing packages and API & non-API centrifugal pump packages throughout the Middle East.

Our Vision

To deliver world-class service solutions that maximise the life span and efficiency of plant equipment - powered by teamwork, professionalism, and innovation.
