6 CLEAN WATER AND SANITATION

CLEAN WATER AND SANITATION

Ensure availability and sustainable management of water and sanitation for all

How can Torishima contribute with its pumps?

Japan is fortunate to be blessed with abundant water, and we rarely experience water shortages in our daily lives. However, when water is cut off, even for a day, we are acutely aware of how much we appreciate water, as we are unable to wash our hands, cook, or flush our toilets.

2.2 billion people do not have access to clean drinking water and 4.2 billion people do not have access to sanitised toilets. Dirty water and unsanitary toilets can cause infectious diseases, and for women and girls, using the bathroom in the open can be dangerous. Also, the basic and most effective preventive measure for covid19 is hand washing, which is also difficultSo this GOAL 6 was set forth.

Let's make sure that everyone has access to safe water, sanitation and hygiene, and that we can manage them all by ourselves for years to come. Torishima can make a significant contribution to achieving this goal by providing pumps for water supply and sewage systems and for desalination plants.
