FY2014 Financial Results

- Sales, Operating income, Ordinary income and Net income achieved the target as announced.
- Orders received was a little over 10% below the plan.

	Yen in Billion	vs. Previous FY
Orders received	42.8	(▲18.9%)
Sales	46.5	(+1.1%)
 Operating income 	0.4	(+1.3)
Ordinary income	8.0	(+1.4)
Net income	0.4	(±0)

FY2014 Consolidated Financial Results

• Orders received decreased primarily due to strategically-planned orders received ("Strategic Orders") Received") that prioritizes profit rate and quantitative restriction on orders. However, we completed standardization of products and have already resumed aggressive sales activities.

Factor Analysis of Increase and Decrease (Non-consolidated)

FY2014 Results

Improvement plan for non-consolidated operation

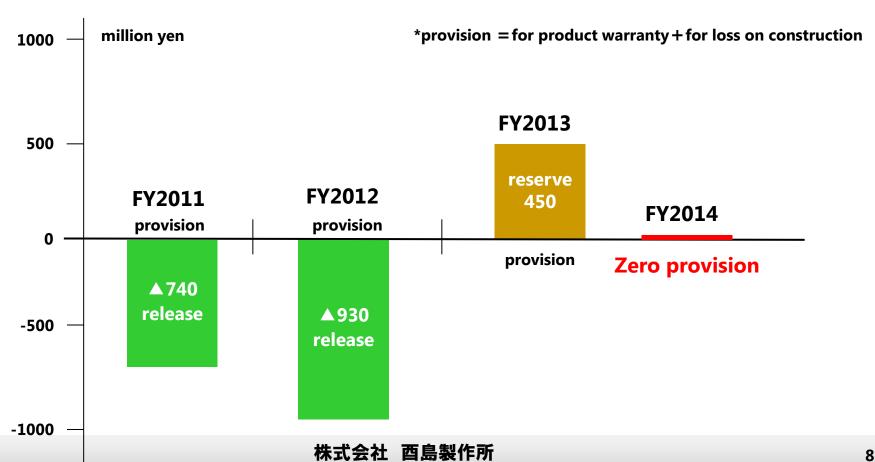

- Overall achieved as planned announced in November 2014.
- "Increase in sales" and "Decrease in SG&A" were above the plan,
 "Improvement of gross profit margin" was slightly below the plan.

	Outlook as of Nov. 2014		FY2014 Result		
	outlook	Increased amount	Result	Increased amount	Achieve- ment
(1) Sales	Same level as previous year	±0	¥1.2 billion UP	¥0.2 billion	
(2) Improvement of gross profit margin	2~3%UP	¥0.9 billion	1.8% UP	¥0.6 billion	
(3) Decrease in SG&A	¥0.5 billion DOWN	¥0.5 billion DOWN	¥0.7billion DOWN	¥0.7 billion	
	Total	¥1.4 billion	Total	¥1.5 billion	

FY2014 Results Improvement of gross profit margin(non-consolidated)

- Provision decreased 450 million yen compared to the previous year, contributing to improvement of the gross profit margin.
- Got out of the worst period in adding provision that is a negative impact to profit margin.

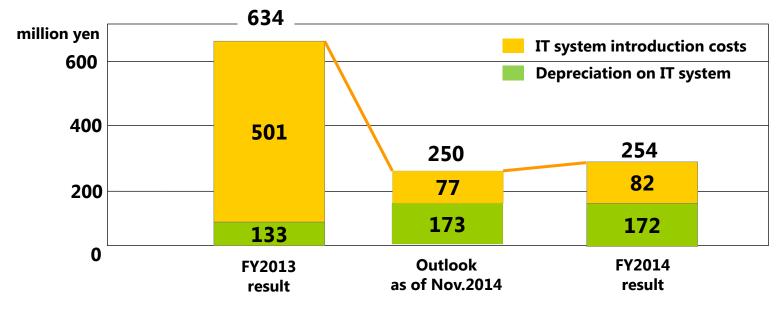

Provision for product warranty and for loss on construction

FY2014 Results Decrease in SG&A expense (non-consolidated)

- IT system related costs significantly decreased as planned.
- Other SG&A (labor cost etc.) also largely decreased.

million yen

	Outlook as of Nov. 2014	FY2014 Result	Increase- Decrease

FY2015 Outlook Decrease in order backlog (decrease in sales) (Non-consolidated)

FY2015 Outlook

3 main drivers of gross profit margin improvement in non-consolidated operation

Completed standardization improves the production process and reduces failure, leading to less warranty costs.

The stabilizing yen's depreciation enhances the profitability and cost competitiveness, and procurement cost is less likely to increase so quickly.

Increase the rate of service business that has relatively higher margin.

FY2015 Outlook The process of standardization initiative

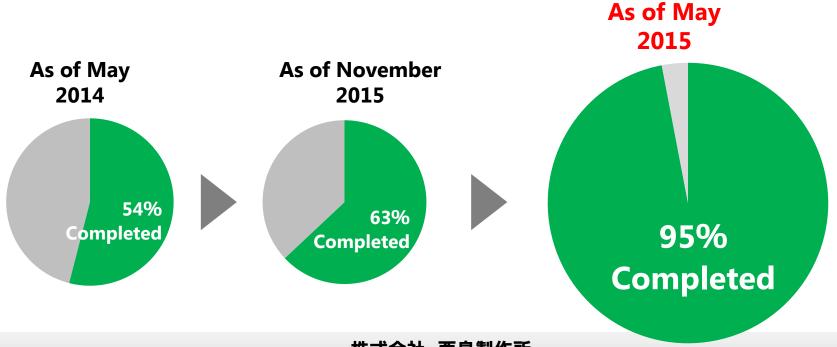

TORISHIMA

No more restriction on orders.

FY2015 is the first year of Torishima standardization.

We have already resumed aggressive sales activities.

FY2015 Outlook Benefits from standardization

Benefits for mainly Torishima

- Smoother drawing process enables engineers to focus on more creative work
- Cut costs for procurement and manufacturing
- Reduce mistakes
- Reduce product warranty claims

Benefits for mainly customers

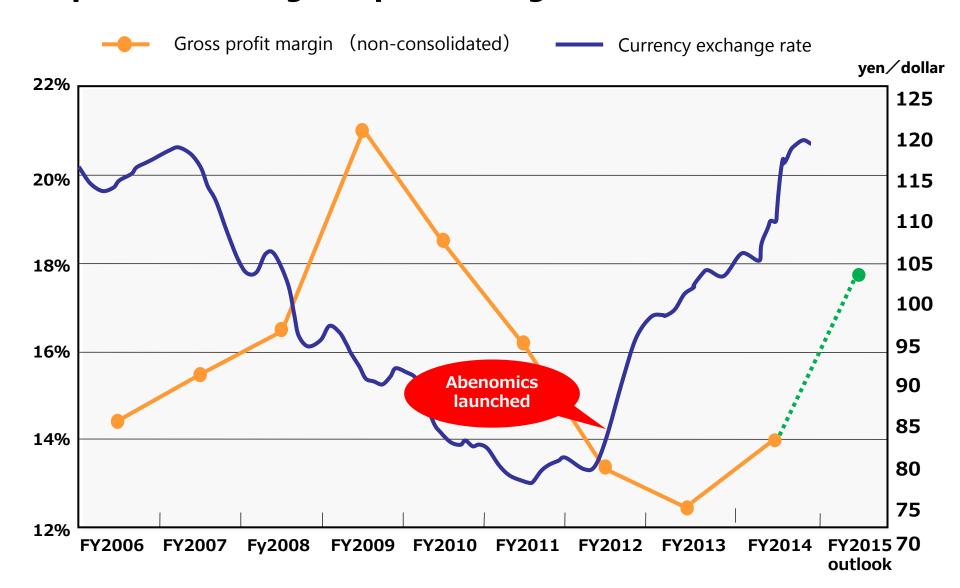

- Quicker quotation with more accuracy.
- Shorter delivery
- Higher quality of products
- Reduce troubles after sales

Both of Torishima and our customers enjoy benefits, bolster a "Win-Win" relationship between us.

FY2015 Outlook

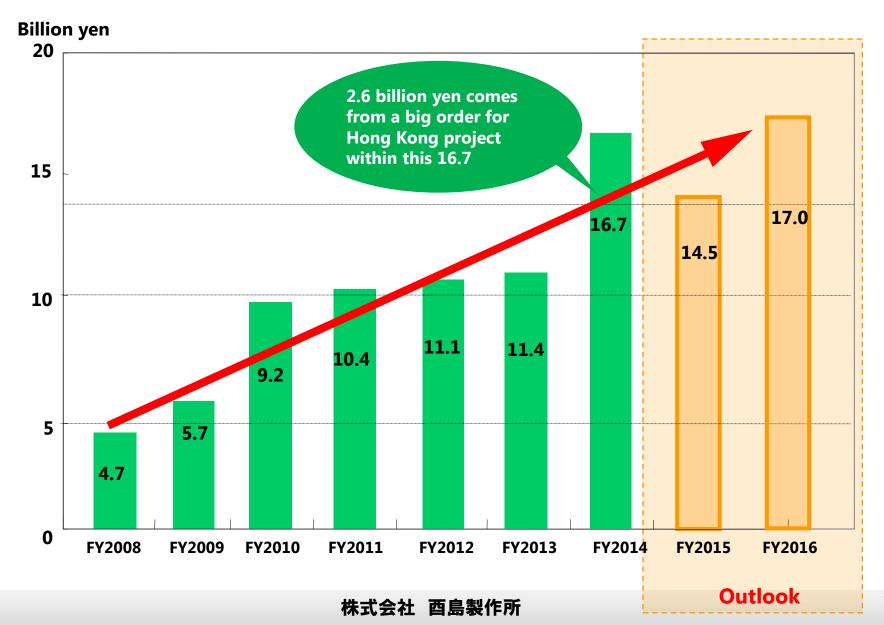

Improvement of gross profit margin (non-consolidated)

Increasing demand for thermal power plants in Japan ①

Torishima's strength: Provide all pumps used in thermal power plants.

Business topics

- Our "Go Green with Pumps" initiative wins the "Energy Conservation Grand Prize".
- Increasing recognition of our new products and technology in our targeted market.
 - **1** Robust boiler feed pump

for thermal power plants

2 Submersible pump with motor unit

for drainage pumping stations

3 Pump with vortex preventing solution

for drainage pumping stations

Win the "Energy Conservation Grand Prize"

Torishima 's energy-efficiency initiative "Go Green with Pumps" has won the Minister's Prize, The Ministry of Economy, Trade and Industry in the Grand Prize for Excellent in Energy Efficiency and Conservation (Business Model Category).

The Energy Conservation Grand Prize is sponsored by Japan's Energy Conservation Centre (JEC) and supported by the Japanese Ministry of Economy, Trade and Industry (METI) which aims to raise awareness of energy efficiency and to promote energy conservation activities.

What is the "Go Green with Pump"?
See details -> www.torishima.co.jp/en/award.html

Newly developed products and technology

1 Robust boiler feed pump

MHG-A

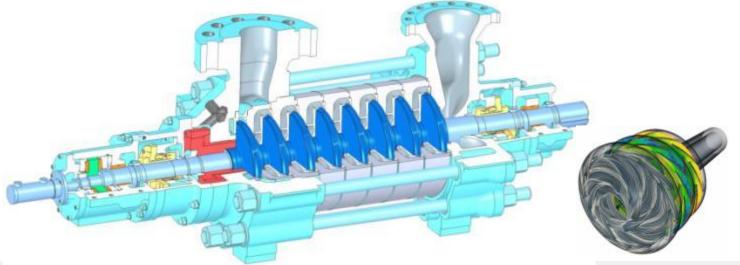

***A for Advanced**

- Higher pump efficiency
- Less vibration
- Flexible to load change Improved suction performance

Torishima has developed the new type of Boiler Feed Pump, MHG-A to meet customers' demand at the higher level amid rapidly changing business environment. In recent years, renewable energy has been promoting but on the other hand, the natural energy still heavily depend on weathers or seasons. Consequently, the conventional power plants are required to operate flexibly to cover this instability.

Torishima's MHG-A is more robust and able to operate in wider operating requirement.

We aim to increase orders for this MHG-A across the world.

Newly developed products and technology

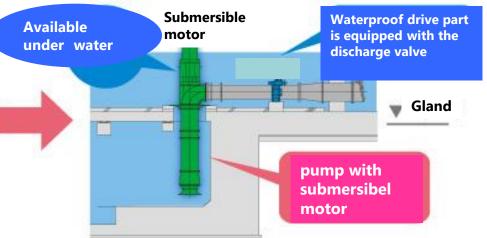

- 2 Pump with submersible motor
- Available in emergency in which the pump is flooded.
- **Highly quake resistance.**
- Lower installation cost than conventional type.

Patented technology

Conventional pumping station

motor **Available** motor discharge valve shaft joint mounting under water Gland Conventional pump

The Torishima solution

Newly developed products and technology

3 Pump with vortex preventing solution

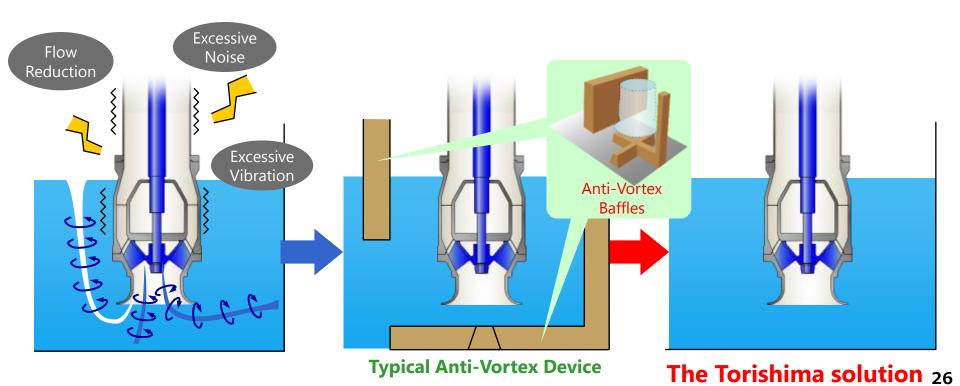

Patented

technology

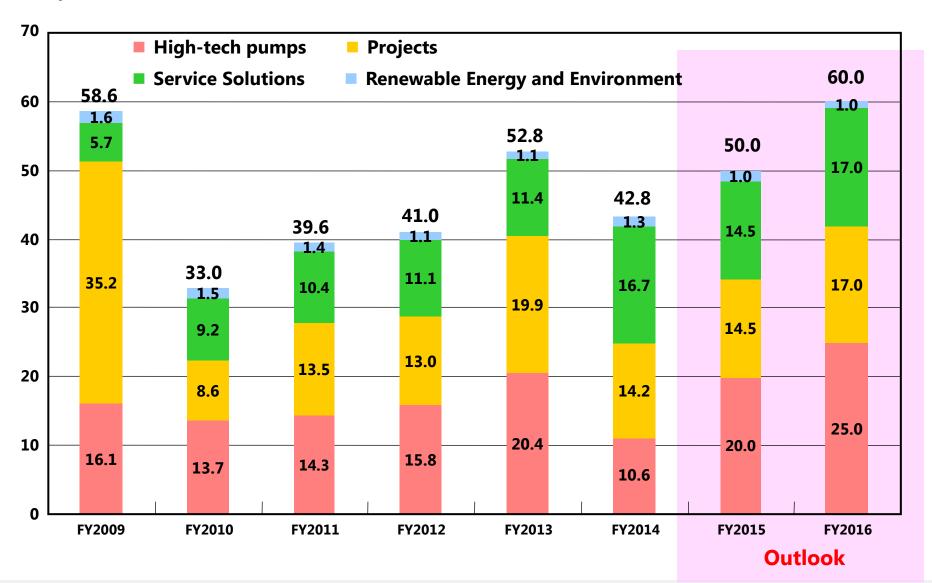

- **☑** No need for civil cost.
- **☑** Shorter construction and lower cost.
- **☑** Higher safety

Outlook for order by segment

Billion yen

Forecasts regarding future performance in these materials are based on judgment made in accordance with information available at the time this presentation was prepared. Therefore, please notice that there is a risk or uncertainty that the actual results may be different from these predicted results, depending on various factors.
