FY2015 Financial Results

| | Billions of yen | YOY |
|--------------------------------------|-----------------|----------|
| Orders received | 51.3 | (+19.7%) |
| Sales | 40.5 | (-13.0%) |
| Operating income | 0.4 | (±0) |
| Ordinary income | - 1.7 | (-2.5B¥) |
| Net income | - 2.4 | (-2.8B¥) |

FY2015 Consolidated Financial Results

- Orders received slightly larger than originally planned, increased by 20% YOY with strong order activities.
- Sales were below originally planned due to some project delayed.
- Gross profit margin improved despite sales decrease. Gross operating income and operating income remained at the same level of the previous year (below originally planned).
- Ordinary income and net income significantly decreased due to mainly one-time factors.

※ announced on 12th March 2015

Main factors for large decrease in profit

- Net income before tax for the FY2015 was minus 1.4 billion yen, lower 2.8 billion yen than initially planned.
- 2.5 billion yen of the 2.8 billion yen were mainly attributed to one-time factors.
- Torishima recognized the reversal of deferred tax asset, resulting in the net income of minus 2.4 billion yen.
- Torishima maintains the year-end dividend of 9 yen per share (yearly dividend is 18 yen).

| | Original plan | Results | Gap |
|--------------------------|---------------|---------|---|
| Net income before tax | +1.4B¥ | -1.4B¥ | -2.8B¥ One-time factors -2.5B¥ Decreased sales -0.3B¥ |
| Net income | +1.0B¥ | -2.4B¥ | -3.4B¥ |

Currency exchange rates and gross profit margin TORISHIMA (Non-consolidated)

The lead time of pumps is relatively long, from one year to one and a half years, the impact of currency exchange rate therefore also tend to be lagging.

The proportion of overseas sales accounts for approximately 50 to 60% of total sales.

TORISHIMA PUMP MFG, CO., LTD.

Expansion of service network

Torishima has launched service facilities mainly in areas where we installed a number of pumps. We can provide our customers with prompt handling and satisfactory services.

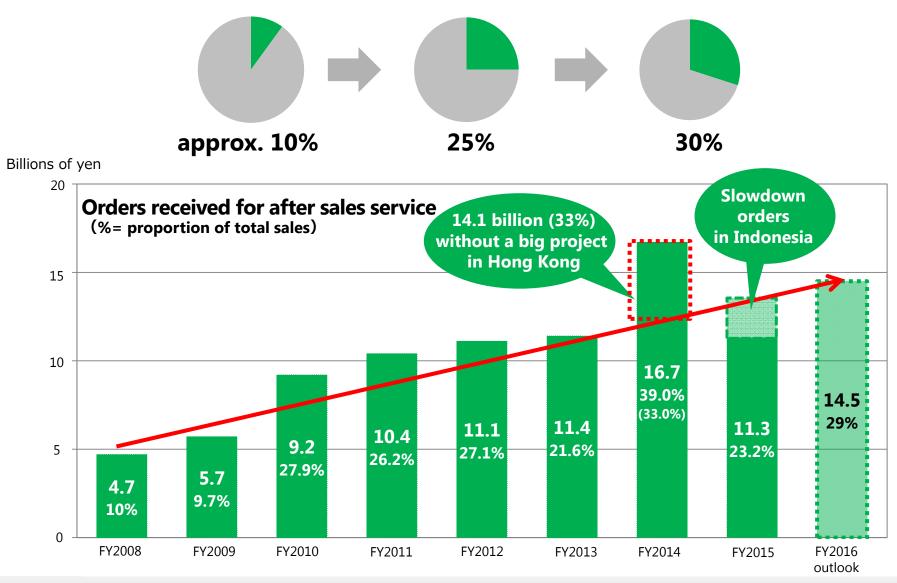

9 countries in the world

(including Japan)

Increase the proportion of after sales services () TORISHIMA

Focusing on after sales services and increasing its proportion of total sales.

Outlook for order by segment

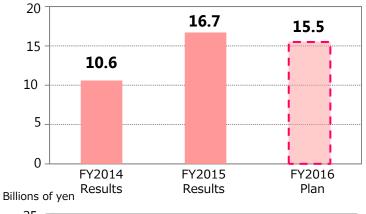

Outlook for orders received by segment

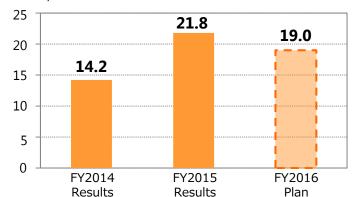

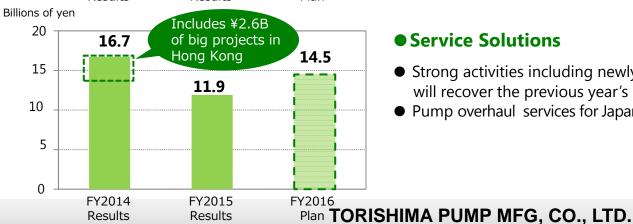

High tech pumps

- Seawater desalination market is unlikely to bounce back in the short term.
- Energy demand is steadily expected to increase particularly in emerging nations.
- Investment projects on large power plants in Japan have been underway.

Projects

- Slightly down following big orders received in Qatar during the FY2015.
- Domestic market is expected to be firm supported by public spending.

Service Solutions

- Strong activities including newly established service facilities abroad will recover the previous year's downturn.
- Pump overhaul services for Japanese power plants has been steadily increasing.

Share repurchase

Torishima decided to implement of the repurchase of shares in an effort to return capital to our shareholders as well as part of the capital structure strategies. On the basis of a resolution passed at a meeting of its board of directors held on 4th February 2016, the Company authorized a repurchase of our own shares up to 600,000 shares.

| Total number of authorized repurchase shares | Up to 600,000 shares | | | | |
|--|--|--|--|--|--|
| Total number of shares repurchased | 210,000 shares equal to 0.76% of total issued shares excluding treasury shares | | | | |
| Total amount of repurchase price | JPY 191,411,100 | | | | |
| The timing of repurchase | 8 th February – 28 th March 2016 | | | | |
| Method of repurchase | Through open market on Tokyo Stock Exchange | | | | |

Keywords to understand Torishima

| TGT | Torishima Global Team A dedicated sales team for the overseas market which was launched in 2003. Although Torishima had been supplying pumps to some foreign countries since the late 1960s, its main focus had been on the domestic public sector. However, the Japanese pump market for public projects became saturated in 1998, so accordingly Torishima accelerated full-scale overseas expansion with a grim outlook for the domestic market. As a result of this decisive action, orders from overseas increased to account for approximately 60% of total sales from 10% at the time of launching TGT. |
|--------------------------------------|---|
| TSS | Torishima Service Solutions The service branch in Dubai, UAE. TSS offers a wide range of after sales services including spare parts replacement, maintenance and energy-efficiency initiatives for engineered pumps which Torishima installed in the Middle East. Since its launch in 2009, TSS has been expanding its business activities and grown to the biggest profit contributor of the Company among all subsidiaries. Another workshop was recently launched in Dammam, Saudi Arabia as a subsidiary of TSS. |
| TIS | Torishima Innovation System An ambitious project launched in June 2013 aiming to develop efficient production systems. TIS improves the manufacturing process throughout orders received, design, procurement, manufacturing to after sales services. During the initial starting period, Torishima incurred additional start-up costs and their was some confusion. However, getting past these issues, TIS has settled in and has continuously improved as a system. TIS is one of the strategic paths to becoming a proactive global company. |
| Standar- dization & 7:3Rule | Despite the fact that Torishima has rapidly boosted the amount of orders and sales following the full-scale business expansion around the world since 2003, the Company had difficulties in dealing with large numbers of orders with the Japanese conventional way of handling orders (complete made-to-order). The Company therefore undertook the task of standardizing products. The first attempt started in 2008 but didn't work well because there was not enough time due to the handling of high volumes of orders. As a result of this, the design and production departments were overwhelmed and confused, which drove the profit margin down (FY2013). Taking this failure seriously, the Company intentionally declined some new orders during FY2014 in order to prioritize production standardization, and almost completed the standardization at the end of March in 2015. The Company resumed proactive sales activities in FY2015 and the number of orders received increased again. The 7:3 Rule is the principle in which 30% customization is still allowed. This is because unlike common standard products, pumps are required to be customized to a certain extent according to customers specifications. In addition, the 7:3 Rule also means that we should spare 30% of energy for more creative jobs while managing 70% routine work in an efficient way. |
