- 1. Qualitative information for the second quarter of the FY2015
 - (1) Qualitative information on consolidated results of operations

During the first half of the FY2015, in the U.S., the economic environment remained a strong trend with solid consumer spending despite sluggish export and manufacturing due to the appreciation of the US dollar and downfall in crude oil price. However, the economy has also been seeing uncertainties amid the stock market turbulence resulting from concerns about economic growth in emerging countries centering on China and increasing signs of reduction of quantitative monetary easing.

In Europe, although the exports to outside EU steadily grew with the weak Euro, refugee crisis from Syria and government debt problems decelerated economic recovery as a whole.

In emerging countries centering on China, economic growth was sluggish in several countries, leading to the uncertain outlook as the world stock prices has declined.

In Japan, the economic condition was not completely recovered from the following reasons: Although the Nikkei Stock Average recovered to 20,000 yen-level driven by strong corporate earnings, it plummeted to 17,000 yen due to declines in global stock prices triggered by the Chinese and the US stock markets; the capital investment has been slowdown due to uncertainties over the global economy; the export has not grown as expected due to relatively week competitiveness compared to emerging countries; the consumer spending has not bounced back enough after the consumption tax increase.

The pump manufacturing industry remained steady demand for water- and energy-related sector in overseas and for maintenance work in aging infrastructure facilities in Japan. However competition for orders in the industry continued to be severe due to the uncertain global economy.

Orders received during the second quarter of the FY2015 (April 1, 2015-Sept. 30, 2015) increased by ¥9,715 million from the same period last year to ¥31,069 million. Orders received from domestic public sector decreased by ¥52 million from the same period last year to ¥6,849 million, orders received from domestic private sector increased by ¥948 million from the same period last year to ¥3,874 million and orders received from overseas sector increased by ¥8,819 million from the same period last year to ¥20,345 million.

Net sales during the second quarter of FY2015 (April 1, 2015-Sept. 30, 2015) decreased by \$171 million from the same period last year to \$17,775 million.

Operating loss during the second quarter of the FY2015 (April 1, 2015-Sept. 30, 2015) amounted to ¥652 million (operating losses during the same period last year were ¥1,034 million). The ratio of operating income to net sales amounted to -3.7%.

Ordinary loss amounted to ¥880 million (ordinary loss during the same period last year were ¥845 million) due to the recording of ¥516 million in Foreign exchange losses as non-operating expenses despite the recording of ¥300 million in Gain on redemption of investment securities as non-operating income. The ratio of ordinary income to net sales amounted to -5.0%.

Net loss amounted to ¥415 million (net loss during the same period last year was ¥561 million). The ratio of net income to net sales amounted to -2.3%. Net loss per share amounted to ¥15.10.

From the first quarter under review, the Group is applying the Accounting Standard for Business Combinations (ASBJ Statement No. 21; September 13, 2013) etc. Under the accounting standard applied, net loss is presented as "loss attributable to owners of parent."

(2) Qualitative information on consolidated financial position

At the end of the second quarter (Sep. 30, 2015), the Group's total assets amounted to \(\frac{\pmathbf{4}66,083}{66,083}\) million, \(\frac{\pmathbf{5}}{5,904}\) million lower than at the end of the previous fiscal year (March 31, 2015). Principal changes in asset items included a decline in notes and accounts receivable-trade of \(\frac{\pmathbf{4}}{6,495}\) million.

Total liabilities at the end of the second quarter amounted to \(\pm\)30,117 million, \(\pm\)5,337 million lower than at the end of the previous fiscal year. Principal changes in liability items included a decline in notes and accounts payable-trade of \(\pm\)4,629 million despite an increase in long-term loans payable of \(\pm\)1,084 million.

Net assets at the end of the second quarter amounted to \\infty35,965 million, \\infty566 million lower than at the end of the previous fiscal year.

(3) Qualitative information on consolidated earnings forecasts
Forecasts for the fiscal year ending March 31, 2016 announced on May 12, 2015 have not been changed.

2. Other information

- (1) Changes in significant subsidiaries during the second quarter of the FY2015 (July 1, 2015-Sept. 30, 2015) No items to report
- (2) Adoption of special accounting methods for presenting quarterly consolidated financial statements

 In determining tax expenses, the effective tax rate after application of tax effect accounting for income before income taxes for the consolidated fiscal year, inclusive of the second quarter of consolidated FY2015, has been estimated in a rational manner, and tax expenses have been calculated by multiplying the quarterly income before income taxes and adjustments by this estimated effective tax rate.

However, we use the statutory effective tax rate in cases where the estimated effective tax rate is unavailable.

(3) Changes in accounting principles, accounting estimates and correction of prior period errors

Application of Accounting Standard for Business Combinations, etc.

Effective April 1, 2015, the Company has applied "Accounting Standard for Business Combinations" (Accounting Standards Board of Japan (ASBJ) Statement No. 21 issued on September 13, 2013), "Accounting Standard for Consolidated Financial Statements" (ASBJ Statement No. 22 issued on September 13, 2013) and "Accounting Standard for Business Divestitures" (ASBJ Statement No. 7 issues on September 13, 2013). As a result, the accounting method was changed to record the difference arising from changes in the equity in subsidiaries under ongoing control of the Company as capital surplus, and acquisition-related costs as expenses for the fiscal year in which they are incurred. In addition, with respect to any business combination entered into on or after the first day of the first quarter under review, the accounting method was changed to reflect adjustments to the allocation of acquisition cost under provisional accounting treatment on the consolidated financial statements of the quarterly financial period in which the relevant business combinations became or will become effective. Furthermore, the presentation of quarterly net income, etc., was changed, and "minority interests" was changed to "non-controlling interests." In order to reflect the changes in the presentation, certain reclassifications have been made to the quarterly consolidated financial statements with respect to the second quarter of the previous fiscal year.

The Company has applied the Accounting Standard for Business Combinations, etc. in accordance with transitional provisions in paragraph 58-2(4) of the Accounting Standard for Business Combinations, paragraph 44-5(4) of the Accounting Standard for Consolidated Financial Statements and paragraph 57-4(4) of the Accounting Standard for Business Divestitures, prospectively on April 1, 2015.

As a result, operating loss and ordinary loss during the second quarter under review increased \(\)40 million respectively. Net loss before income taxes and minority interests decreased by \(\)439 million. Capital surplus at the end of the second quarter under review decreased by \(\)438 million
