## ① Shuaiba Pump Plant “C” (2008)

In 1976, Torishima supplied the pumps and ancillary equipment as a turnkey project for the Shuaiba Pump Plant “C” located in Kuwait’ s Shuaiba Industrial Park.

This pump station supplied cooling water everyday since its construction, even throughout the Gulf War. In 2007, as part of a program to increase the supply of cooling water to meet the planned increase in petroleum product production, we undertook this project to boost the capacity of the pump station and repair ancillary equipment.

Supply Cooling Water Pumps

- 18,000m<sup>3</sup>/h - 55.5m - 3,500kW - 9units
- 13,626m<sup>3</sup>/h - 79.2m - 4,100kW - 5units

Installation of cooling water pump

Installation of a 10.5 MVA power generator
